

The file can either be ran through BlueJ or using the Command Prompt.

A screenshot of a Windows Command Prompt window. The title bar reads "Command Prompt - java -jar BibFormatter.jar". The window content shows the following text: "Microsoft Windows [Version 10.0.18363.752]", "(c) 2019 Microsoft Corporation. All rights reserved.", "C:\Users\zingz>cd C:\Users\zingz\OneDrive\Documents\NetBeansProjects\BibFormatter\dist", and "C:\Users\zingz\OneDrive\Documents\NetBeansProjects\BibFormatter\dist>java -jar BibFormatter.jar".

```
Command Prompt - java -jar BibFormatter.jar
Microsoft Windows [Version 10.0.18363.752]
(c) 2019 Microsoft Corporation. All rights reserved.

C:\Users\zingz>cd C:\Users\zingz\OneDrive\Documents\NetBeansProjects\BibFormatter\dist

C:\Users\zingz\OneDrive\Documents\NetBeansProjects\BibFormatter\dist>java -jar BibFormatter.jar
```

To run the executable from the command prompt, first move to the file's directory using `cd` then type the following command: `java -jar BibFormatter.jar`
